Budapest, Hungary, 17- 05- 2009. Thomas Picture Kiadó Publisher Ltd. launches it's free online digital nature magazine, that is the first of it's kind in the world. The magazine spreads across more than 80 pages, and it is free for you to browse. It 's uniqueness is being interactive, that means that above the amazing quality pictures and articles it can show video formats as well. The readers have nothing else to do but to register for free and enjoy. Imre Tamas the owner of the company said the followings:

Are we in the present, or perhaps this is the future already? – We did ask ourselves in the editorial office.

Yes, dear readers, we are in the present with a brand new, free online nature photography magazine. There are several reasons why we need to take the stage in an international setting in both Hungarian and English languages. Our primary objective is to present to the reader Eastern Europe's natural beauty, photographers and locations. But of course at the same time we do not exclude ourselves from exploring the treasures of Western Europe and the world at large.

In the magazine you can find articles about the animal kingdom and landscapes, together with technical information. We have tried to introduce the nature photography vivid manner with our team. Our tricks and tips section could be useful for the novice photographers and for advanced artists as well, providing a form of traineeship and guidance. We have embraced both youth and photographers with compact cameras as well. And by way of speciality, representing a first in the world, we are going to start a series of astro-photography which will take the reader on a journey into the mysterious and unique way of photographing the stars and galaxies.

Our interactive magazine, initially appearing every quarter year, will provide interesting and high quality and reading material for everyone. Admittedly, our full name is rather long, but we hope within a short period of time everybody will know what Természetfotó Magazin and Nature Photo Magazine will stand for.

Our colleagues are on the ground in all corners of the world, endeavouring to capture the secrets of nature through their camera lens and bringing the beauty and fragility of Mother Nature to your doorstep. This is one of the main missions of Nature Photo Magazine.

At the same time we must never forget, that even we nature photographers sometimes have to restrain from taking the perfect picture in the interest of protecting the natural world.
